## Chapter 1

# Introduction

The following release notes state known problems and last minute changes to Open Text eDOCS DM Version 5.2.1 CU2. We recommend that you read these Release Notes in conjunction with the documentation included with the software package. If any conflicts exist, the Release Notes supersede the other documentation.

Check the [Open Text Knowledge Center](https://knowledge.opentext.com/) at (<https://knowledge.opentext.com/>) for any patches or documentation updates that may have been posted after the initial release of this version of DM 5.2.1 CU2.

## Chapter 2

# **About Open Text eDOCS DM 5.2.1 CU2**

## **SaveUI and Profile Form Hotfix**

### **2.1 General Information**

The DM 5.2.1 CU2 SaveUI and Profile Form Hotfix release is a hotfix containing three dll files which are meant to be copied into the appropriate directories on the eDOCS DM 5.2.1 CU2 client workstation. These dlls are meant **ONLY** for workstations which have DOCS DM 5.2.1 CU2 installed and do not need to be applied to the server.

## Chapter 3

# Packaging and Documentation

## 3.1 Documentation

All documentation for the hotfix is contained within these Release Notes.

---

## Chapter 4

# Installation and Upgrade Notes

DM 5.2.1 CU2 SaveUI and Profile Form Hotfix files are provided when you download **DMExt521\_CU2B59.zip**. To install the patch the files must be copied to the following locations on the eDOCS DM 5.2.1 CU2 client workstations:

Hummingbird.DM.Extensions.Controls.DMFormControl.dll: C:\Program Files\Hummingbird\DM Extensions

Hummingbird.DM.Extensions.Controls.LocationControl.dll: C:\Program Files\Hummingbird\DM Extensions

Hummingbird.DM.Extensions.Controls.ProfileTypeFormCompositeControl.dll: C:\Program Files\Hummingbird\DM Extensions

It is recommended that you backup the original files by renaming them prior to copying the new ones into place. Please note that your directory structure may differ if you have installed eDOCS DM in a different location.

---

## Chapter 5

### Fixed Issues and Known Issues

Following is a list of the issues resolved in DM 5.2.1 CU2 SaveUI and Profile Form HotFix. For more information on an issue, go to the [Open Text Knowledge Center](#) and search on the Key number (such as DM-4124), which can be found at the beginning of the title, or you may contact Technical Support.

#### 5.1 Fixed Issues

DM-16868	If there are date fields or checkboxes on a profile form, the values you enter will not be saved when saving a document into DM for the first time.
DM-16890	Static Text boxes do not show multi-lines nor alignment correctly
DM-16898	Unable to scroll on a large form

DM-16864	Radio button groups on a profile form are displayed as a black box and cannot be used
DM-16866	Font size and Border Styles do not appear correctly on profile forms
DM-16021	BMP files are not being displayed on the profile form
DM-16869	Custom fields that link to look-up tables, but are not designated with proper look-up data entry fields on the form are not being set as read-only. This affects check box, radio group and edit fields. This would include a field that is automatically populated when another lookup is chosen, similar to the author name being populated as a read-only field when choosing Author on the profile.

DM-16876	Changing the tab order on the Profile Form from DM Designer gets saved correctly but is not reflected while saving a document to DM
DM-16882	Prompt for Forms Box leaves off the last character on a profile form

## 5.2 Fixed Issues in Previous Releases

You should review the Fixed Issues for all releases between the one you are upgrading from and this release. You can find this information in the following documents:
