Requirements:

- Microsoft Windows 2003/XP;
- Opentext eDOCS;
- Symantec Enterprise Vault.

Want to Know More?

We can customize **corEV** to meet your requirements and provide services tailored to your unique needs.

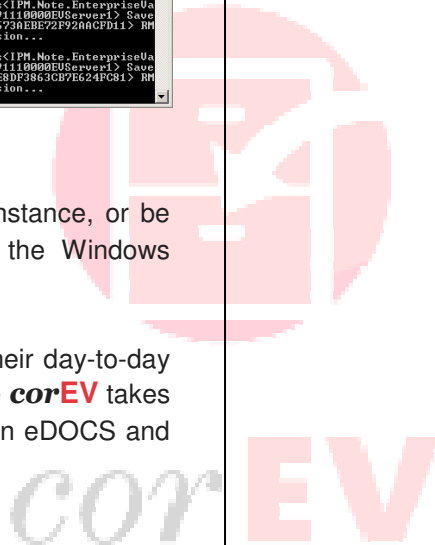

For more information contact us at the address below.

corEV can be run as a single instance, or be run as a scheduled task using the Windows Scheduler.

Users can continue to focus on their day-to-day document and records tasks while **corEV** takes care of optimizing storage between eDOCS and Enterprise Vault.

Benefits of using **corEV**:

- Simple Installation and Configuration lets you be up and running in minutes;
- No user intervention very fast processing;
- No more orphaned shortcuts in eDOCS;
- Emails can be fulltext indexed in eDOCS;
- Optimized Storage and Performance of eDOCS Servers;
- Public Versions can easily be accessed from Enterprise Vault;
- Easy to modify settings in .ini file;
- Process can be scheduled to run regularly;

Optimizing Storage between eDOCS and Enterprise Vault

About Coreedge Software

Founded in 1991, Coreedge Software Inc. is a leader in software tools designed for rapid analysis of unstructured electronic data. Coreedge provides solutions designed to handle the ever increasing volumes of unstructured information including the growing surge of electronic messages and their effect on organizations tasked with the need to maintain proper and legally defensible records systems.

Coreedge also offers:

Coreedge Federated Search is a simple-to-use full-text search interface permitting users to simultaneously search multiple repositories. Currently supports Symantec Enterprise Vault, Opentext eDOCS, Microsoft Outlook, and IBM Lotus Notes Mail.

COR:Mail and **COR:DB** middleware products, which seamlessly integrate Lotus Notes Mail and databases with Opentext eDOCS;

Discover why Fortune 100 companies trust COR:Mail as a proven, unparalleled, mature and stable Lotus Notes/Opentext eDOCS integration.

Record Profiler, a hands-free and easy-to-train tool for automatically profiling and classifying documents based on content. Currently supports Opentext eDOCS;

Record Digger, a robust, easy-to-use and readily accessible tool able to instantly expose the subject matter essence of electronic records based on their content.

"On behalf of our team here at British American Tobacco Australasia, I would like to extend a big thank you to your team for partnering with us on some major development work this year, and to enable our team to deliver some major project outcomes over this period. A particular mention and thanks to be extended to Support for the countless night sessions they had to endure. We also look forward to continue this successful working relationship with Coreedge into 2008 and beyond." Hue (BATA)

"I have to say that you guys are the most responsive vendor I have ever dealt with. Thanks!..." Chris (large fast-food chain)

"Before I explain my problem, hats off to all you folks. This is by far some of the fastest customer service I've ever received. Good stuff." Scott (communications center)

"Give the contract to Coreedge. They know what they're doing." Ian (Major North American car manufacturer)
