

COR:Mail Plus

Native integration of Lotus Notes Mail with Opentext eDOCS Document Management

COR:Mail Plus brings Opentext eDOCS document management services to Lotus Notes Mail seamlessly and transparently within a single native interface. COR:Mail Plus converts Lotus Notes Mail and eDOCS DM products into extensions of each other.

At the same time, eDOCS users may invoke Lotus Notes Mail for mailing multiple attachments, references (links), and URLs.

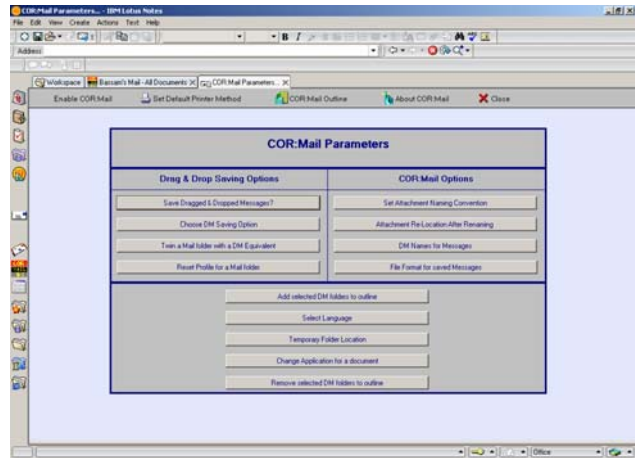

COR:Mail has been used by Fortune 100 companies since 1997. Still today, they trust COR:Mail because it is proven, unparalleled, mature and stable.

COR:Mail enables users to automatically save messages, groups of messages and attachments into DM libraries without manual profiling. Replacing attachments with DM references reduces mailboxes to less than one tenth their original size and frees Lotus Notes to perform with increased speed and efficiency.

By offering the option to save messages in PDF or Domino XML format COR:Mail Plus goes beyond the limitations of Rich Text Format, which loses the message's original format and contextual data.

Key Features:

- Lotus Notes messages are saved into eDOCS DM in PDF, RTF or as DXL (Domino XML); providing increased security consistent with tenets of Sarbanes-Oxley and similar requirements;
- COR:Mail Plus stored files capture and retain the "look and feel" of the original document;
- COR:Mail Plus enables users to modify attachment names in a mail message to overcome Lotus Notes issues arising when attaching files with very long descriptive names;
- COR:Mail Plus includes the powerful features and functions found in its predecessor COR:Mail.

Requirements:

- Opentext eDOCS v4.0 and beyond;
- Opentext DOCS Open v3.7;
- Lotus Notes v5.07 and beyond.

About Coreedge Software

Founded in 1991, Coreedge Software Inc. is a leader in software tools designed for rapid analysis of unstructured electronic data. Coreedge provides solutions designed to handle the ever increasing volumes of unstructured information including the growing surge of electronic messages and their effect on organizations tasked with the need to maintain proper and legally defensible records systems.

Coreedge also offers:

COR:DB and COR:Mail Manager middleware products, which seamlessly integrate Lotus Notes Mail and databases with Opentext eDOCS;

Discover why Fortune 100 companies trust COR:Mail as a proven, unparalleled, mature and stable Lotus Notes/Opentext eDOCS integration.

Federated Search, a simple-to-use full-text search interface permitting users to simultaneously search multiple repositories. Currently supports Symantec Enterprise Vault, Opentext eDOCS, and Microsoft Outlook Mail or Lotus Notes Mail;

Record Profiler, a hands-free and easy-to-train tool for automatically profiling and classifying documents based on content. Currently supports Opentext eDOCS;

Record Digger, a robust, easy-to-use and readily accessible tool able to instantly expose the subject matter essence of electronic records based on their content.

"On behalf of our team here at British American Tobacco Australasia, I would like to extend a big thank you to your team for partnering with us on some major development work this year, and to enable our team to deliver some major project outcomes over this period. A particular mention and thanks to be extended to Support for the countless night sessions they had to endure. We also look forward to continue this successful working relationship with Coreedge into 2008 and beyond." Hue (BATA)

"I have to say that you guys are the most responsive vendor I have ever dealt with. Thanks!..." Chris (large fast-food chain)

"Before I explain my problem, hats off to all you folks. This is by far some of the fastest customer service I've ever received. Good stuff." Scott (communications center)

"Give the contract to Coreedge. They know what they're doing." Ian (Major North American car manufacturer)
